

TEAM GREEN POWER UP

New 800HO Engine Raises the Performance Bar

Snowmobile Product Manager – Joel Hallstrom

Feedback from demo rides aboard the new powered-up, 160hp, 800HO engine puts smiles on all faces who have squeezed the throttle.

Riders across the U.S. and Canada have felt the power and acceleration of this impressive new engine. The power increase, along with the lightweight quick-revving crankshaft, have made the 800HO an early favorite amongst performance riders.

2010 F8 Demo Rides

Customers – Trevor Wallace & Kerry Drul – Winnipeg, Manitoba

The F8 felt noticeably lighter overall compared to current F8s. The 2010 had quick throttle response and awesome mid-range power. Way faster than Kerry's current 2007 F8. We saw speeds in the 110mph range.

Dealer - Terry Bromley – Transcona Trailers – Winnipeg, Manitoba

I love the quick "Zingy" power and throttle response of the new engine!

Media – Kevin Beilke – SnowTech Magazine

"The 2010 F8 Sno Pro is a solid chassis and gives you about the best ride and handling you can get for aggressive trail riders. Better handling, less weight, more power (160hp); guess what we'll be riding next year? One of these, you know it! We grin and start to laugh every time we think of how good this sled works."

2010 CFR 800HO Demo Rides

Dealer - Team Powersports – Ontario

The best part of this is the 2010 CFR 800 just killed all the Ski Doo 800s that people brought to run against it.

Dealer – Pokegama Lawn & Sport – Grand Rapids, MN

Todd was all smiles when he came off the 2010 CFR 800. He opened his helmet and screamed, "Holy S!@# this thing is fast!"
